

Wzorce i standardy referencyjne

HWI pharma services GmbH stands for customised pharmaceutical services. With our core competencies in our divisions Laboratory Services, Reference Standard Services and Vigilance & Quality Services we offer a broad service spectrum for the pharmaceutical industry.

For more than 20 years we have been qualifying reference standards for the development and quality control of medicinal products. Our primary reference standards and working standards meet all current legal and regulatory requirements. Upon request we take over your complete reference standard management. Alternatively we offer the isolation and synthesis of non-purchasable substances from our own department of isolation and synthesis of natural products.

With this catalogue we would like to give you an overview of our programme. We can also provide other reference standards like active components if requested.

Substancja
